Example – Elton Close, KT1

Installation of Gate Barrier Including 3g Intercom System

The Barrier meets all the European safety laws and includes the following features:

- The barrier will have warning lights on the arm and on top of the barrier housing, the warning light on the barrier arm will be illuminated at all times, the warning light on top of the housing will flash when the barrier is either opening or closing.
- Bright yellow thermo plastic lines will be painted on the floor to highlight the danger zones.
- There will be 2 safety sensor zones around the barrier to prevent the arm from accidentally closing.
- 20 Amp Isolator will be installed on barrier.
- Pedestrian Rails will be installed by the barrier and the walkway to direct the flow of traffic.

A new goose neck has also been installed on the driveway that will be used to accommodate the new wireless intercom with built in fob reader that is used by the tenants and visitors to enter the block. A ground loop will be installed that will automatically open the barrier when a car is exiting the building.
